Third Semester BCA (SEP) Degree Examination
Dec./Jan. 2025-26
(Regular)

PYTHON PROGRAMMING

Time : 3 Hrs

Max. Marks : 80

Instruction to Candidates: All the sections are compulsory.

SECTION - A

Answer any TEN questions from the following. Each carries TWO marks. (10x2=20)

1. Name any 2 built-in functions in python and write their use.
2. What is the purpose of return statement in function?
3. What will the following code output?
S = "Python"
Print (S [1 : 4])
4. Define a list and a tuple with examples
5. Define Super () in Python.
6. Write the syntax to open a file in
a) Read mode
b) Append mode
7. Differentiate between finally and else blocks in exception handling.
8. Define inheritance in python.
9. Name 2 meta characters used in regex and write their use.
10. Define pack () layout manager in Tkinter.
11. What is the use of rollback () in database transactions.
12. How do you instal mysql connector in python? Write the syntax.

SECTION - B

Answer any FOUR of the following, each carries FIVE marks.

(4x5=20)

13. Explain the difference between global and local variables with an example for each.
14. How do you create module in python. Show how to import :
a) The whole module
b) A specific function from it.

15. Write a python program to
 - a) Open a file in read mode
 - b) Read and print its contents and
 - c) Delete the file.
16. Write a python program to demonstrate exception handling using 'try', 'except' 'finally' and 'else' block.
17. Explain radio button and list box widget with an example.

SECTION - C

Answer any FOUR from the questions, each carries TEN marks.

(4x10=40)

18. a) Explain layout managers in Tkinter with its attributes. (5)
 b) Write a Python program to demonstrate any 5 string and list operations. (5)
19. a) Explain the differences between for and while loops with an example for each. (5)
 b) Explain the types of inheritance with an example for each. (5)
20. a) Explain Lambda function with atleast 2 examples. Use on with map () function. (5)
 b) Explain regular expressions in Python. Explain any 2 functions of regular expressions. (5)
21. a) Explain any 5 widgets in python using Tkinter with an example for each. (5)
 b) Write Python program to create mode calculation py that contains functions to perform basic arithmetic operations. Demonstrate importing the module. (5)
22. a) Explain the different SQL statements (select, insert, update and delete) using Python with example code. (5)
 b) What are sockets? Explain client server architecture in network programming. (5)
